ABOUT ME /

I am currently a third-year student at the Belarusian State University of Informatics and Radioelectronics, studying in the Faculty of Information Technology and Management, with a major in Automated Information Processing Systems.

I'm curious individual who is always eager to learn and take on new challenges.

WORK EXPERIENCE /

Programming School TeachMeSkills

Java Developer (graduate)

May 2023 - January 2024

Technology Stack:

- Spring Boot 3.2.1;
- Spring Data JPA;
- Spring Security 6, JSON Web Token (JWT);
- H2 Database, PostgreSQL;
- JUnit, Mockito;
- Spring Boot Starter Mail;
- Liquibase;
- Docker, Docker Compose;

Results:

- Analyzed requirements and designed application architecture.
- Developed business logic and application components using Spring Boot and Java.
- Created REST API for client interaction.
- Worked with the database using Spring Data JPA and the selected DBMS (H2 Database and PostgreSQL).
- Implemented security and authentication using Spring Security and JWT.
- Wrote unit tests using JUnit and Mockito.
- Utilized tools to build, test, and deploy the application (e.g., Docker and Docker Compose).
- Configured database migrations using Liquibase.
- Incorporated additional libraries and tools to streamline development and enhance performance (e.g., Lombok, MapStruct, Hibernate Validator).
- Tested, debugged, and optimized the application.
